## Sliding Door System Product Catalog

- 
- ① 145 Panoramic Sliding Window
  - ② 36Pro Panoramic Sliding Door
  - ③ 36Promax Panoramic Sliding Door
  - ④ 39minimax Frameless Panoramic Door
  - ⑤ 20mini Lifting Sliding Door
  - ⑥ 63mini Off-Axis Door

# ┆ Brand concept

## **We take light and architecture as the core of design optimization**

The integration of space and nature creates the artistic beauty of minimalist doors and windows. Based on the performance of doors and windows, To simplify and release the constraints on the soul, Visually perceive the warmth brought by sunlight to the living room, Touch each centimeter of line.

### **Brand:**

High-end customized brand defined by minimalism, aesthetics, and intelligence. It is an early professional manufacturer in China engaged in the research and development and customization of minimalist system doors and windows. Its factory is located in Foshan, Guangdong Province, and its business covers the world! We design every product with an extremely demanding attitude, whether from a technical or artistic aesthetic perspective, to meet the perfect needs of high-end users. Currently, we have developed sliding door system and extremely narrow full screen window system, which combine to achieve a modern lifestyle of luxury and elegance for global users!

# SLIDING DOOR

Exquisite Minimalist Sliding Door System, Inspired by Nature and Local Beauty!

- Extra Width
- Extra Height
- Extra Weight

① The sliding door system adopts T6 specification of primary aluminum in the profile structure design, the deformation resistance strength is 1.5 times that of conventional aluminum, and the local wall thickness reaches 5.mm to achieve calm response under extreme conditions.

② The frame body adopts the design of double broken bridge and multiple broken bridge, which achieves the vertical isothermal effect of the fan and the frame of the two-way double track, and the whole frame adopts 12 corner code glue injection process and invisible drainage design, eliminating the possibility of water leakage of the frame body, plus a special drainage tank combination, effectively improving the waterproof drainage performance of the product

③ The glass configuration can be realized from 6mm-15mm, the maximum total thickness of some products can be 39mm, each glass door will be equipped with explosion-proof technology as standard, in the application of super heavy doors can greatly reduce the vibration caused by push and pull and glass bursting, for the safety and comfort of the home to make a good foundation.

THE LOCAL WALL thickness reaches 5.mm

# SOLUTION

① Our sliding door system, crafted with utmost care, celebrates the harmony between nature and local aesthetics. It is not just a remarkable glass door, but a reflection of our commitment to preserving the essence of your surroundings.

② With its innovative design, our system embraces the natural elements, seamlessly blending into the architectural facade. It boasts a unique national patent, allowing for effortless height adjustments of the inverted wheel groups, ensuring a perfect fit for any space.

③ Beyond its captivating appearance, our sliding door system excels in performance. It withstands strong winds, offers exceptional thermal insulation, waterproofing, and sound insulation properties. Its versatility handles extra width, extra height, and extra weight with ease, catering to diverse architectural preferences.

**professional solutions:** in different international and domestic environments, people have different applications and aesthetics for sliding doors, created dozens of product designs and customized solutions for people's habits and environmental conditions, profile structure development up to hundreds, hardware selection diversification, sealing material full customization, electric and intelligent integration, and two kinds of customized pulley set selection, can achieve more than 90% of the design and use needs, Our continuous aesthetic optimization and technological innovation in horizontal function, experiential broadening, vertical aesthetic optimization and technological innovation have made the translation system a place in the world.

minimalist sliding door system  
Product Advantage  
and Application

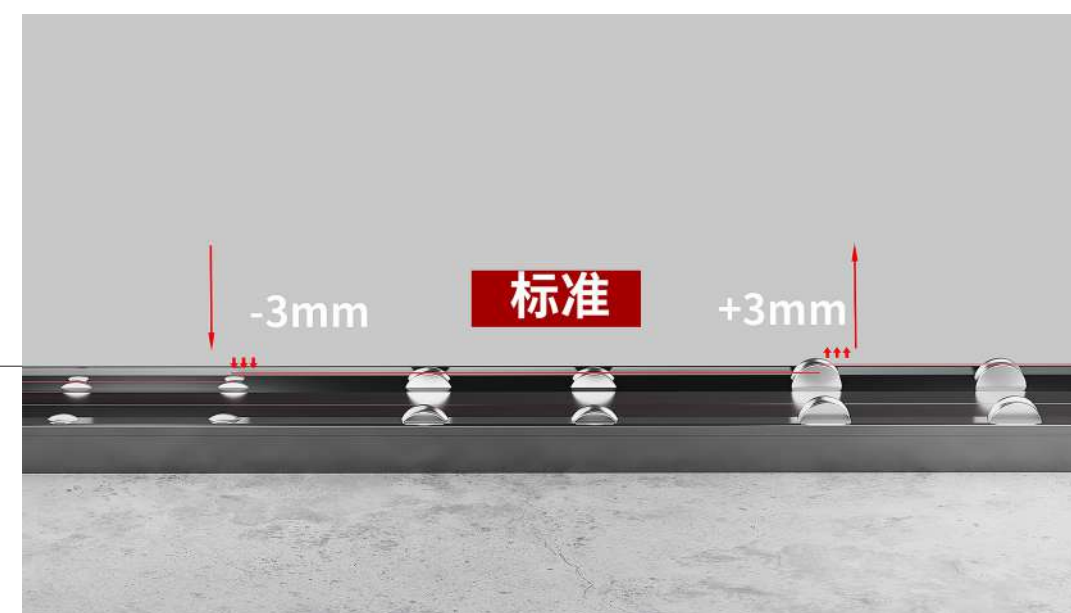

**传统轮组**

Traditional wheel set

**VS**

**标准轮组**

Wheel Group

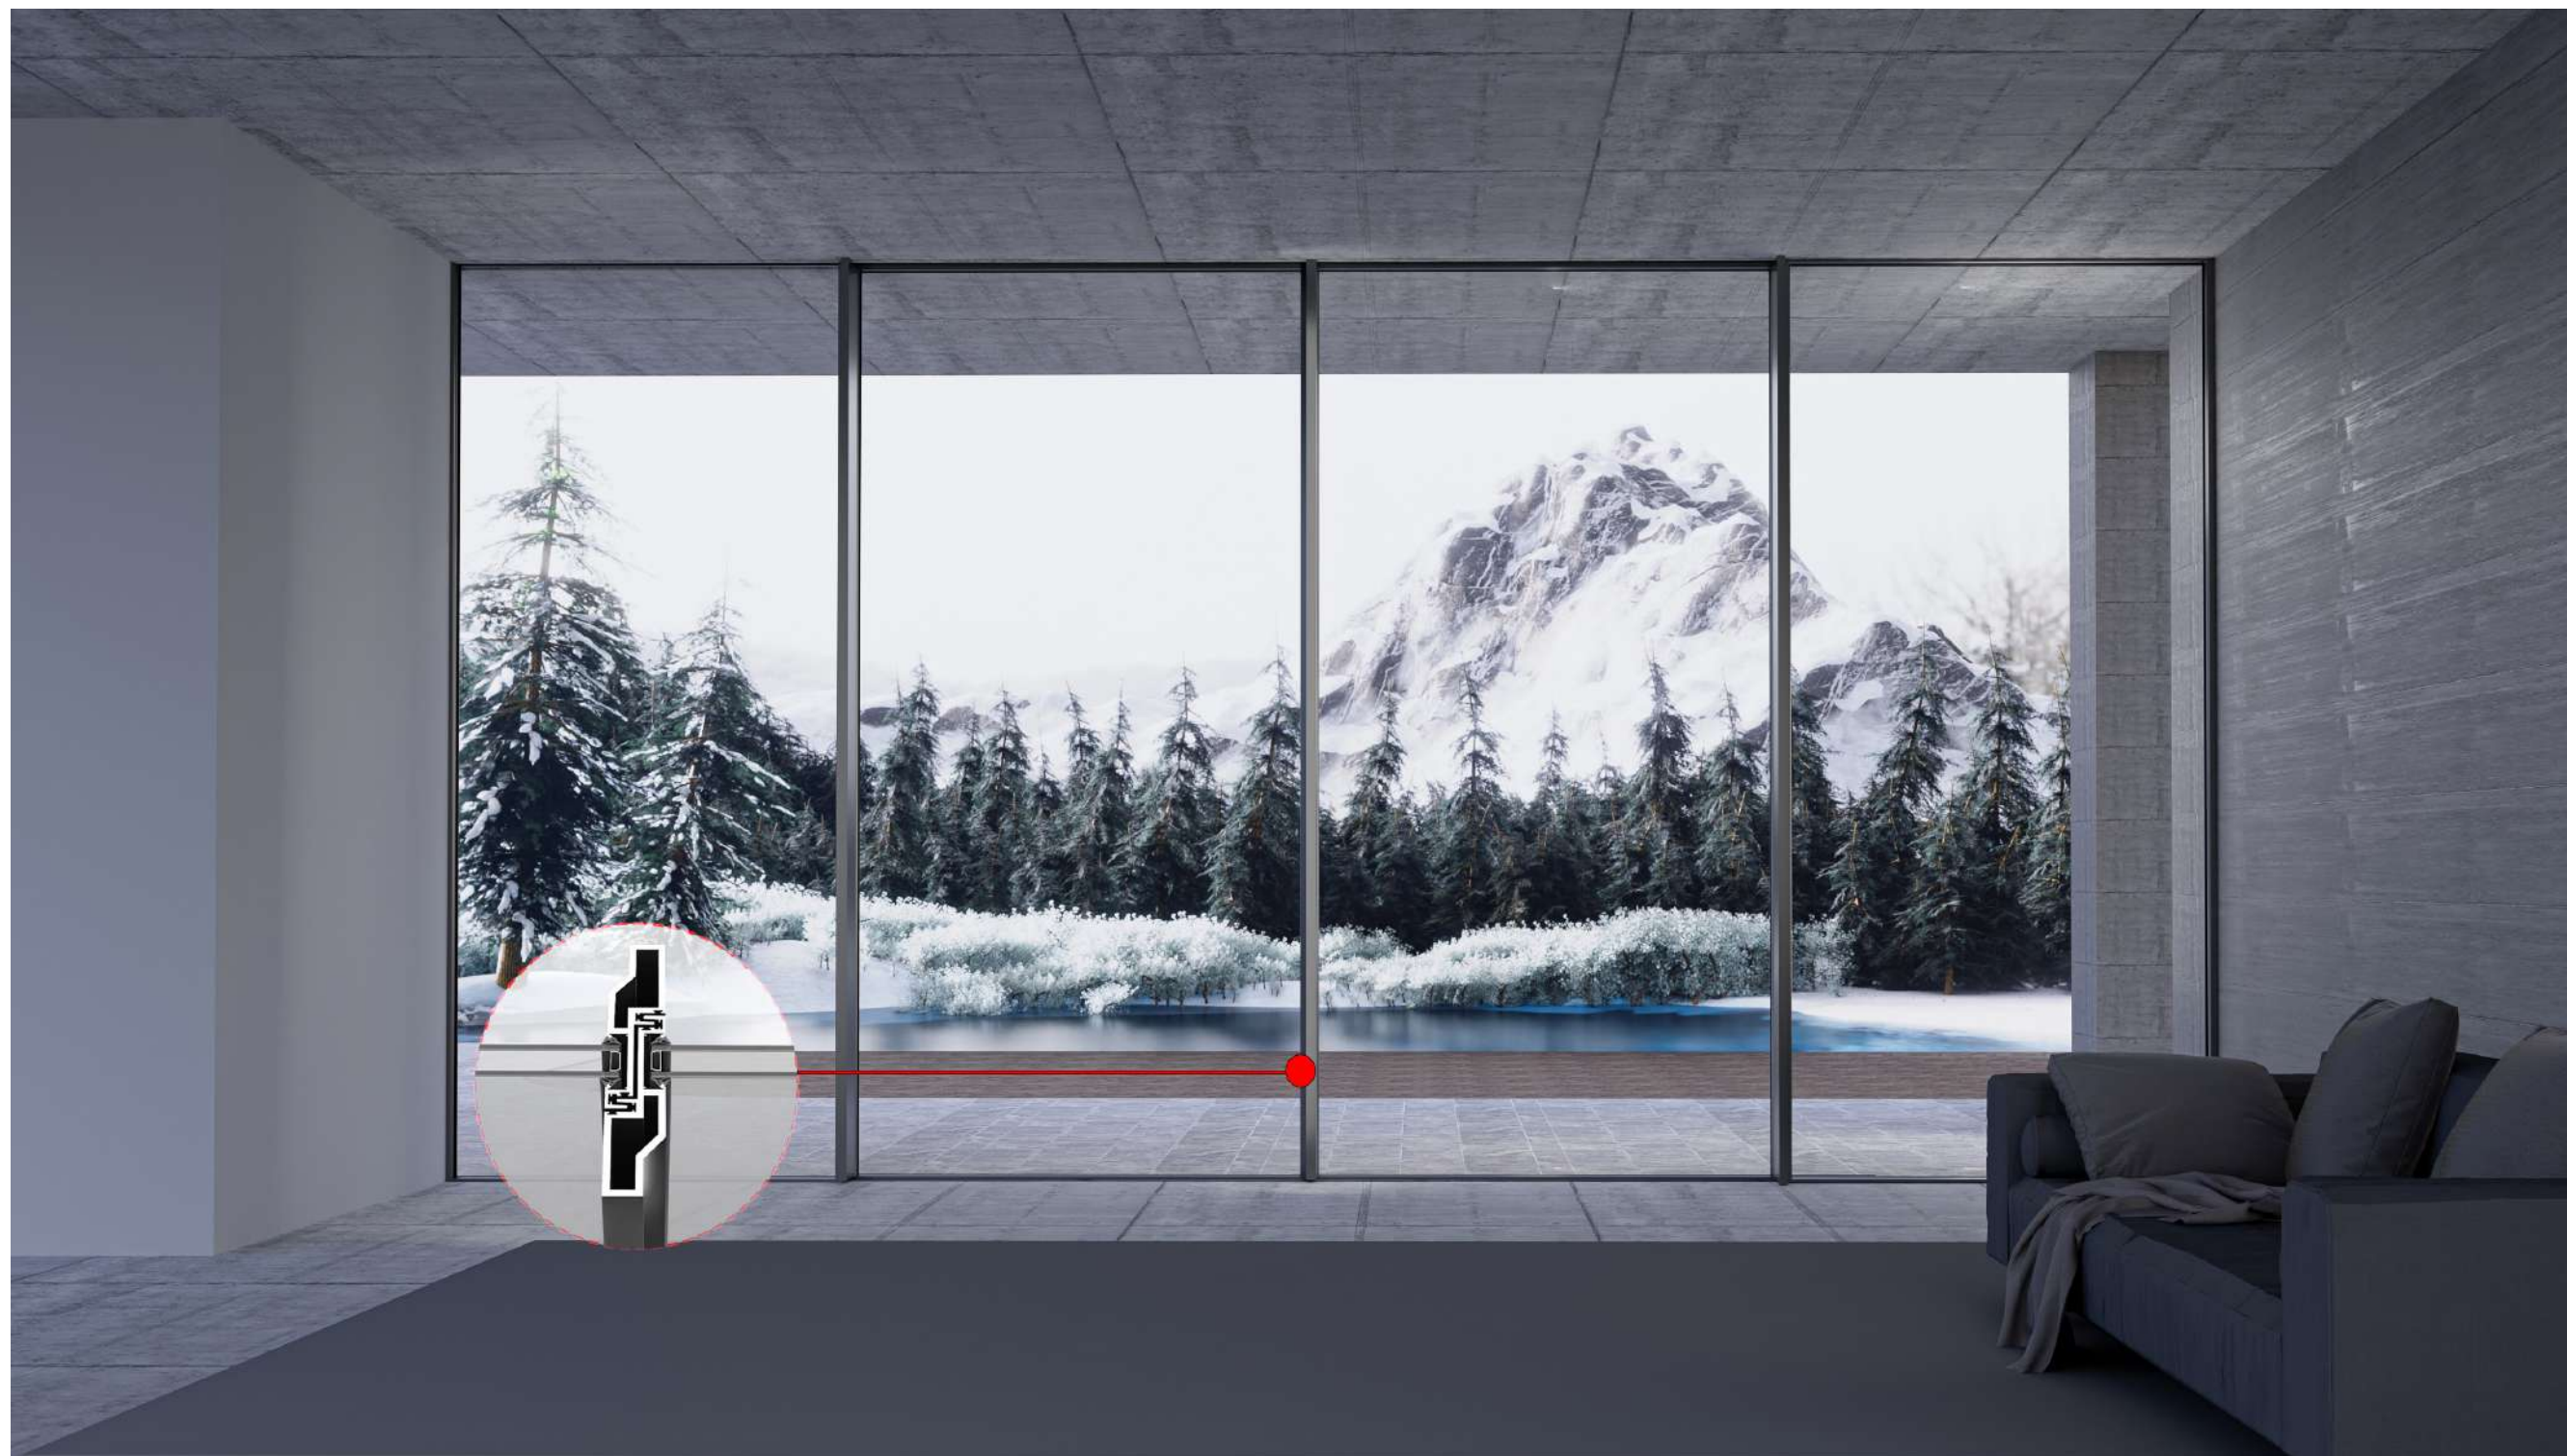

标准专利轮组 / Standard Patent Wheel Group

## Advantage of sliding door system

领域内最具优势的滑动门系统  
轮组可自由调节高低

Professional fixed + opening solution, integrated glass railing safety terminator, built-in reinforced mid-straight design, good wind pressure resistance, can be equipped with left and right folding screen doors, and can roll up and down invisible screen windows.

B A

S L A T I O N

**极致对开门可视面 4CM**

Ultimate opposite door visible surface 4CM

(专利产品, 违者必究)

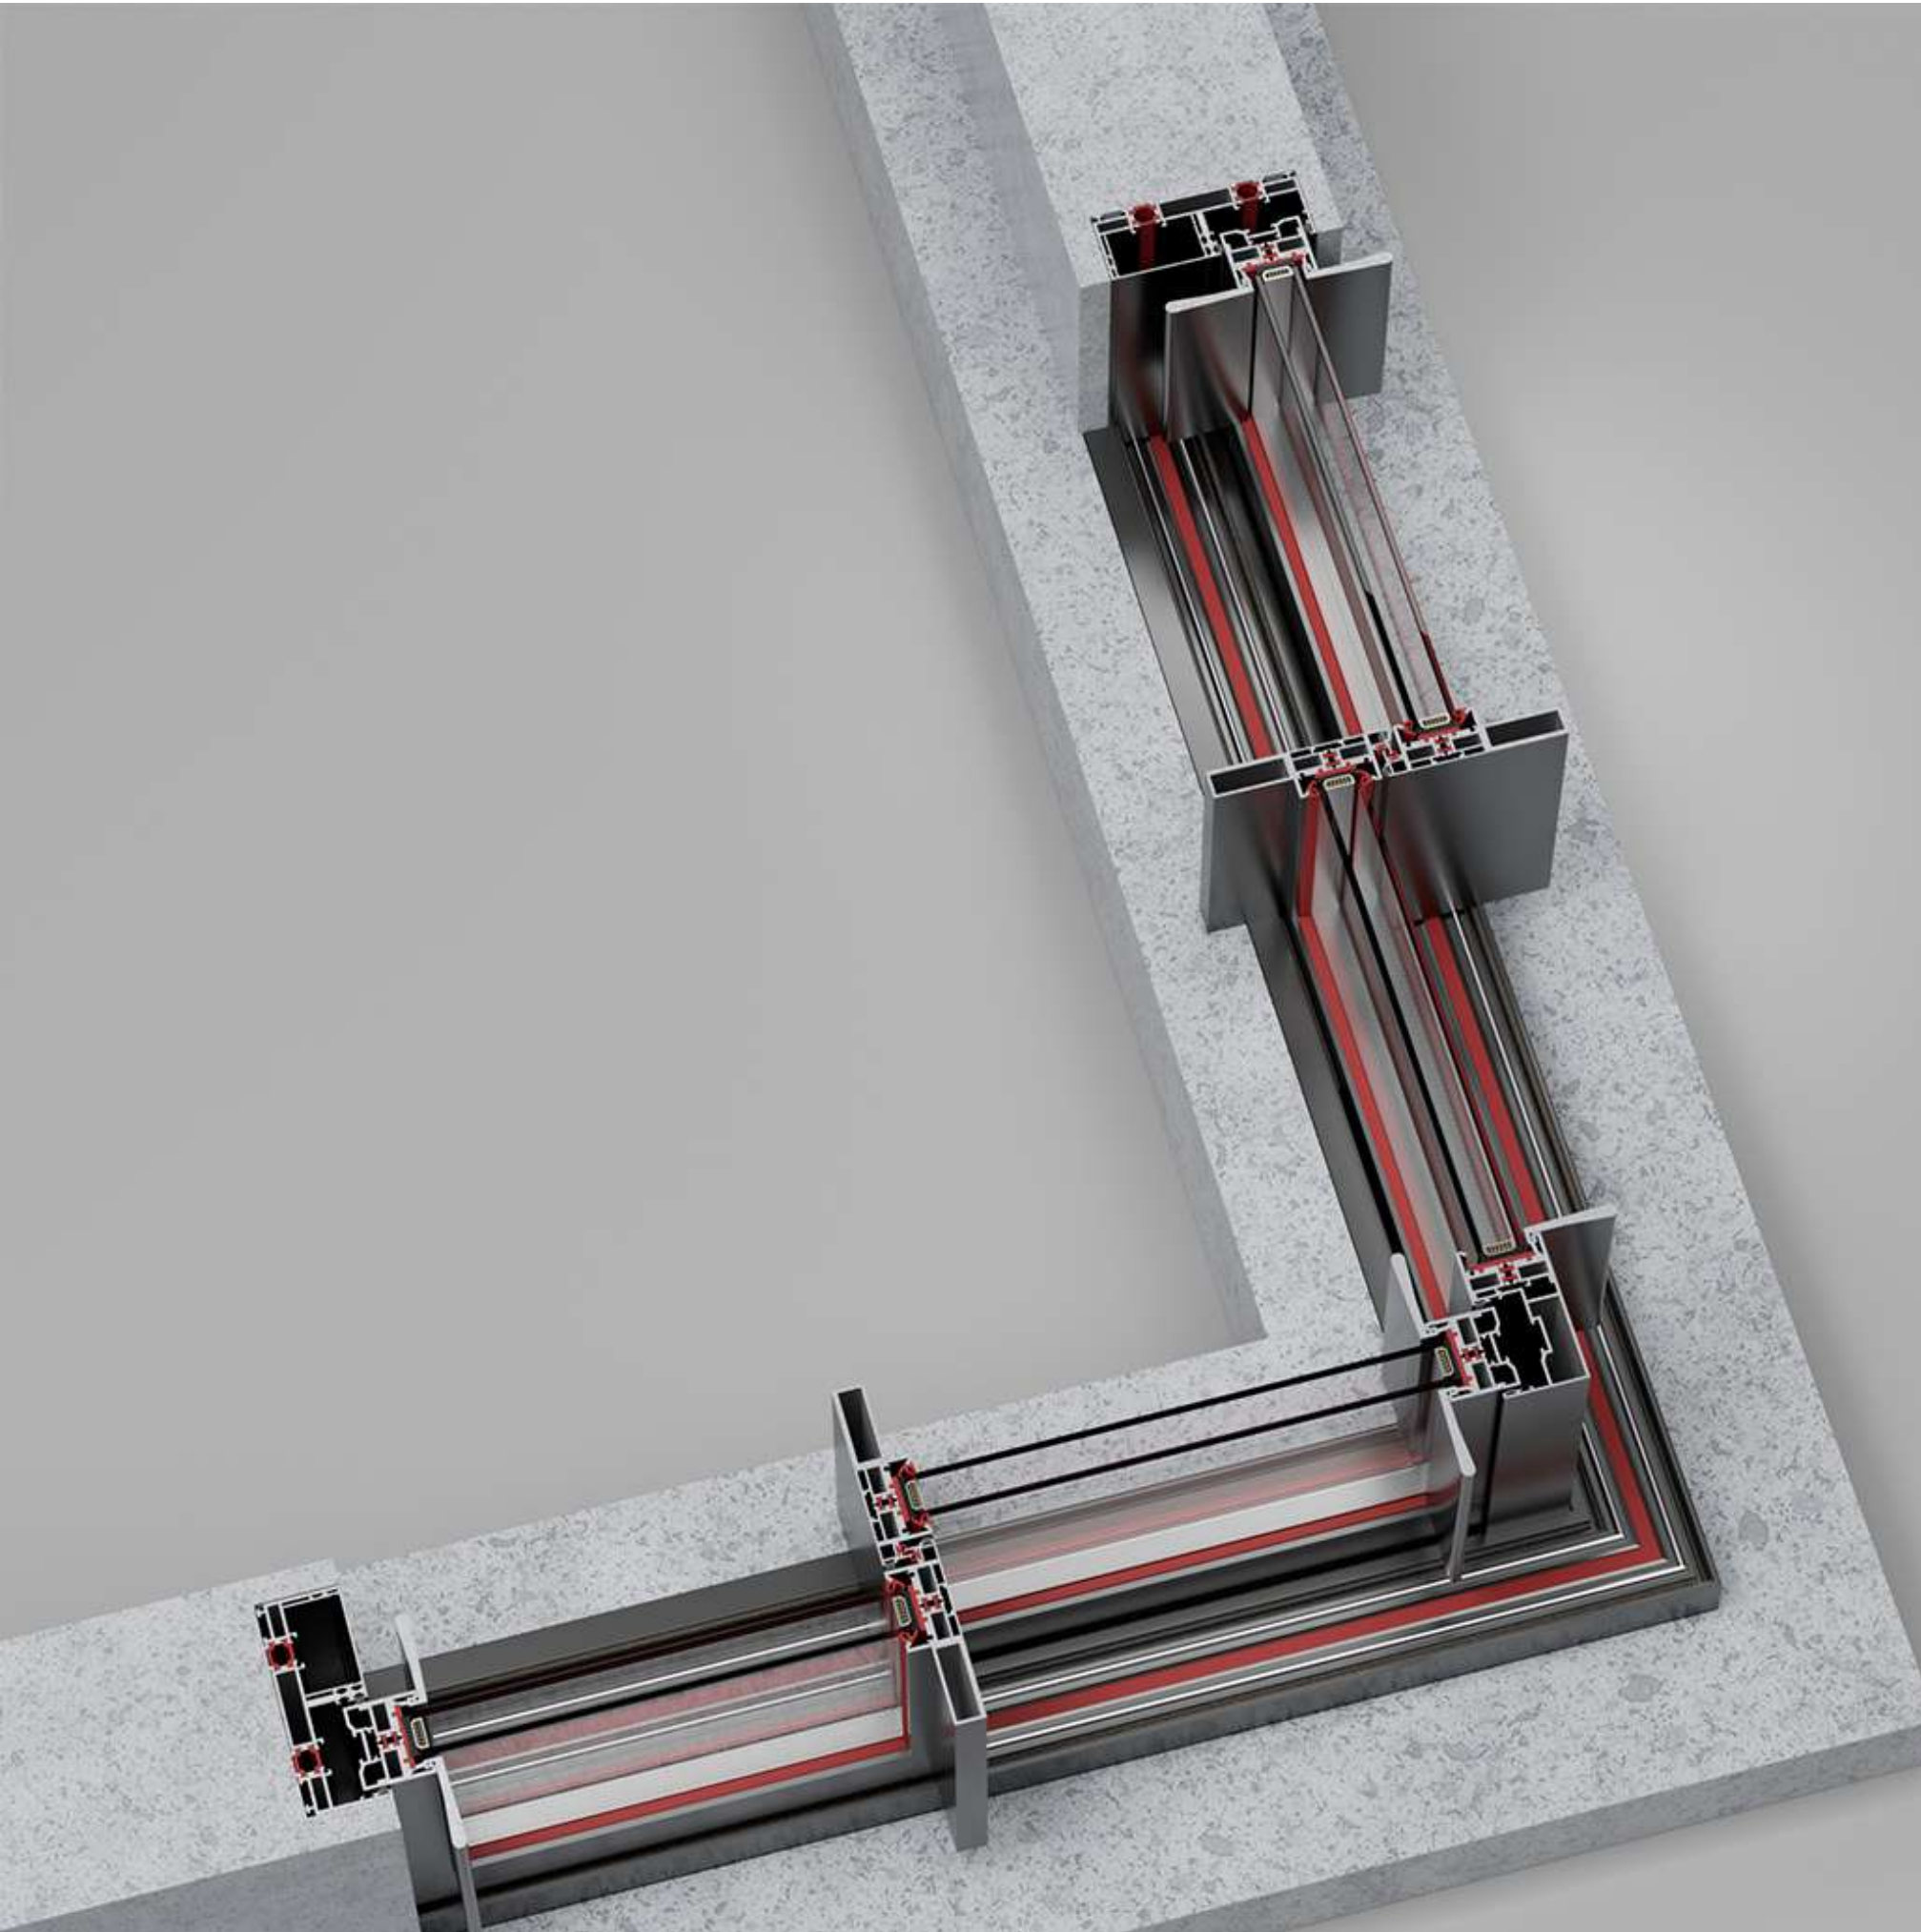

## Hidden Track 可隱軌

---

## Hidden Box 可隱框

---

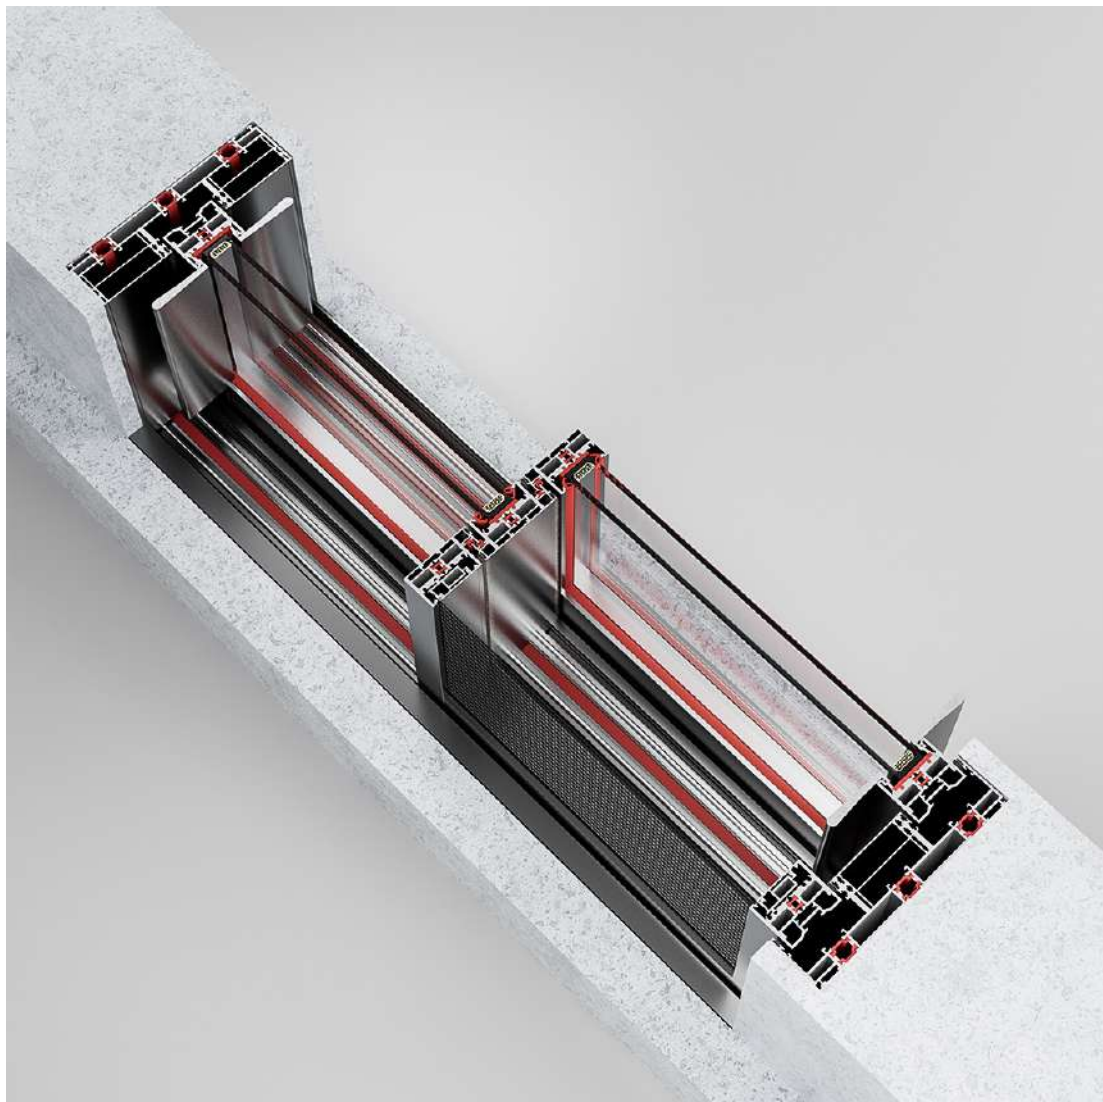

## 90 degree free opening

## 90 度自由开启

非常适合完全敞开式的自由空间  
极窄的 90 度转角，放大室内采光

Perfect for fully open free spaces  
Extremely narrow 90 degree angle, amplifying indoor lighting

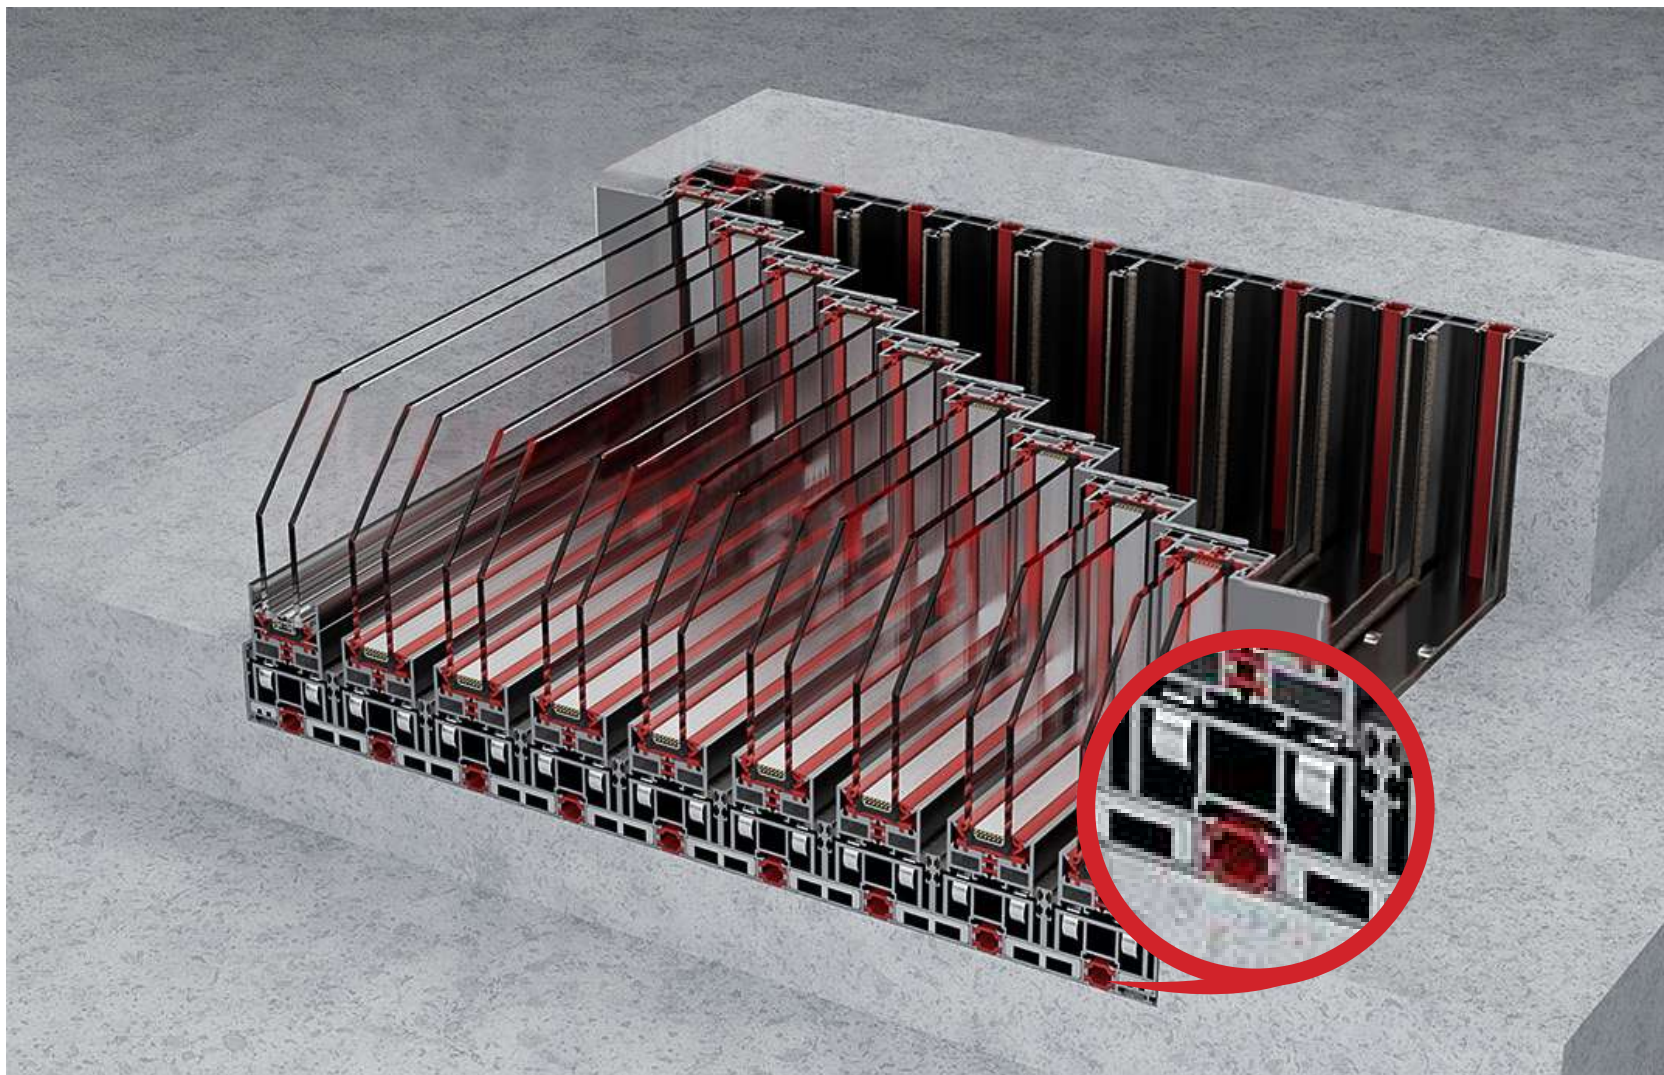

## Three-track ribbon yarn

### 三轨带纱

采用 304 不锈钢金刚网, 80 丝 /45 丝任选  
纱门使用辅框标准化制作组装, 极限降低了纱门的收腰  
防盗级别高。

Using 304 stainless steel diamond mesh, 80 wire/45 wire optional,  
The screen door is standardized and assembled using auxiliary frames, which reduces the limit of the screen door's waist and high anti-theft level.

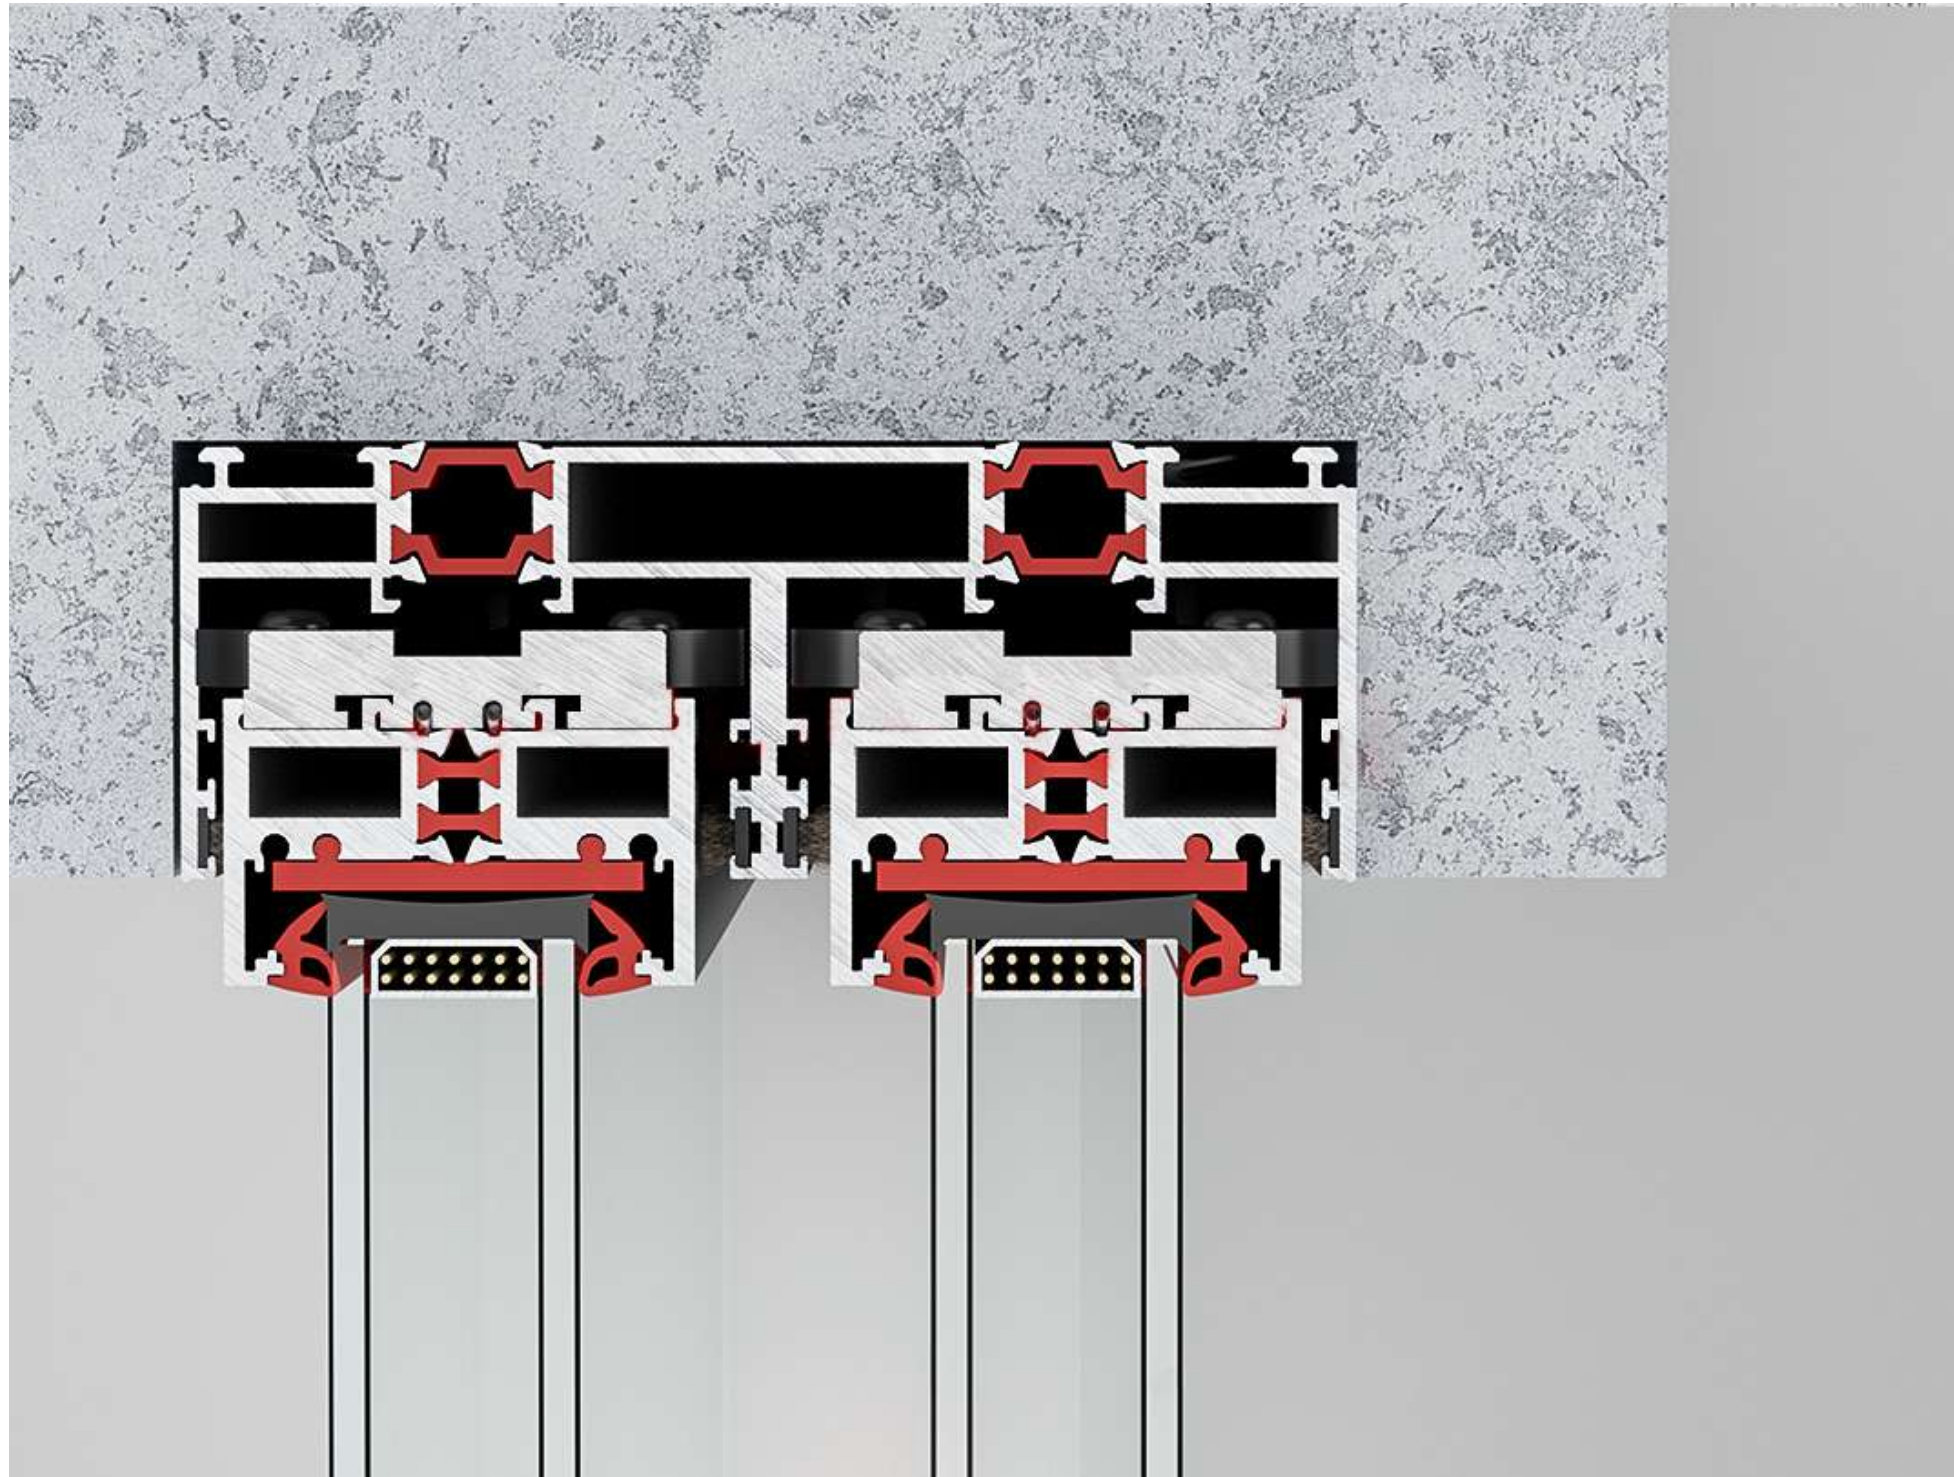

## The solid track liner is designed for oversized, extra-wide and heavy weight

### 实心轨道内衬专为超大超宽超重

极简门轨道负重  
而设计的解决方案, 不论多重的玻璃门都轻松应对。

Minimalist door track loading  
The solution is designed to handle the glass door with ease.

## Solid CNC precision machined anti-tilt wheel

### 实心 CNC 精密加工防摆轮

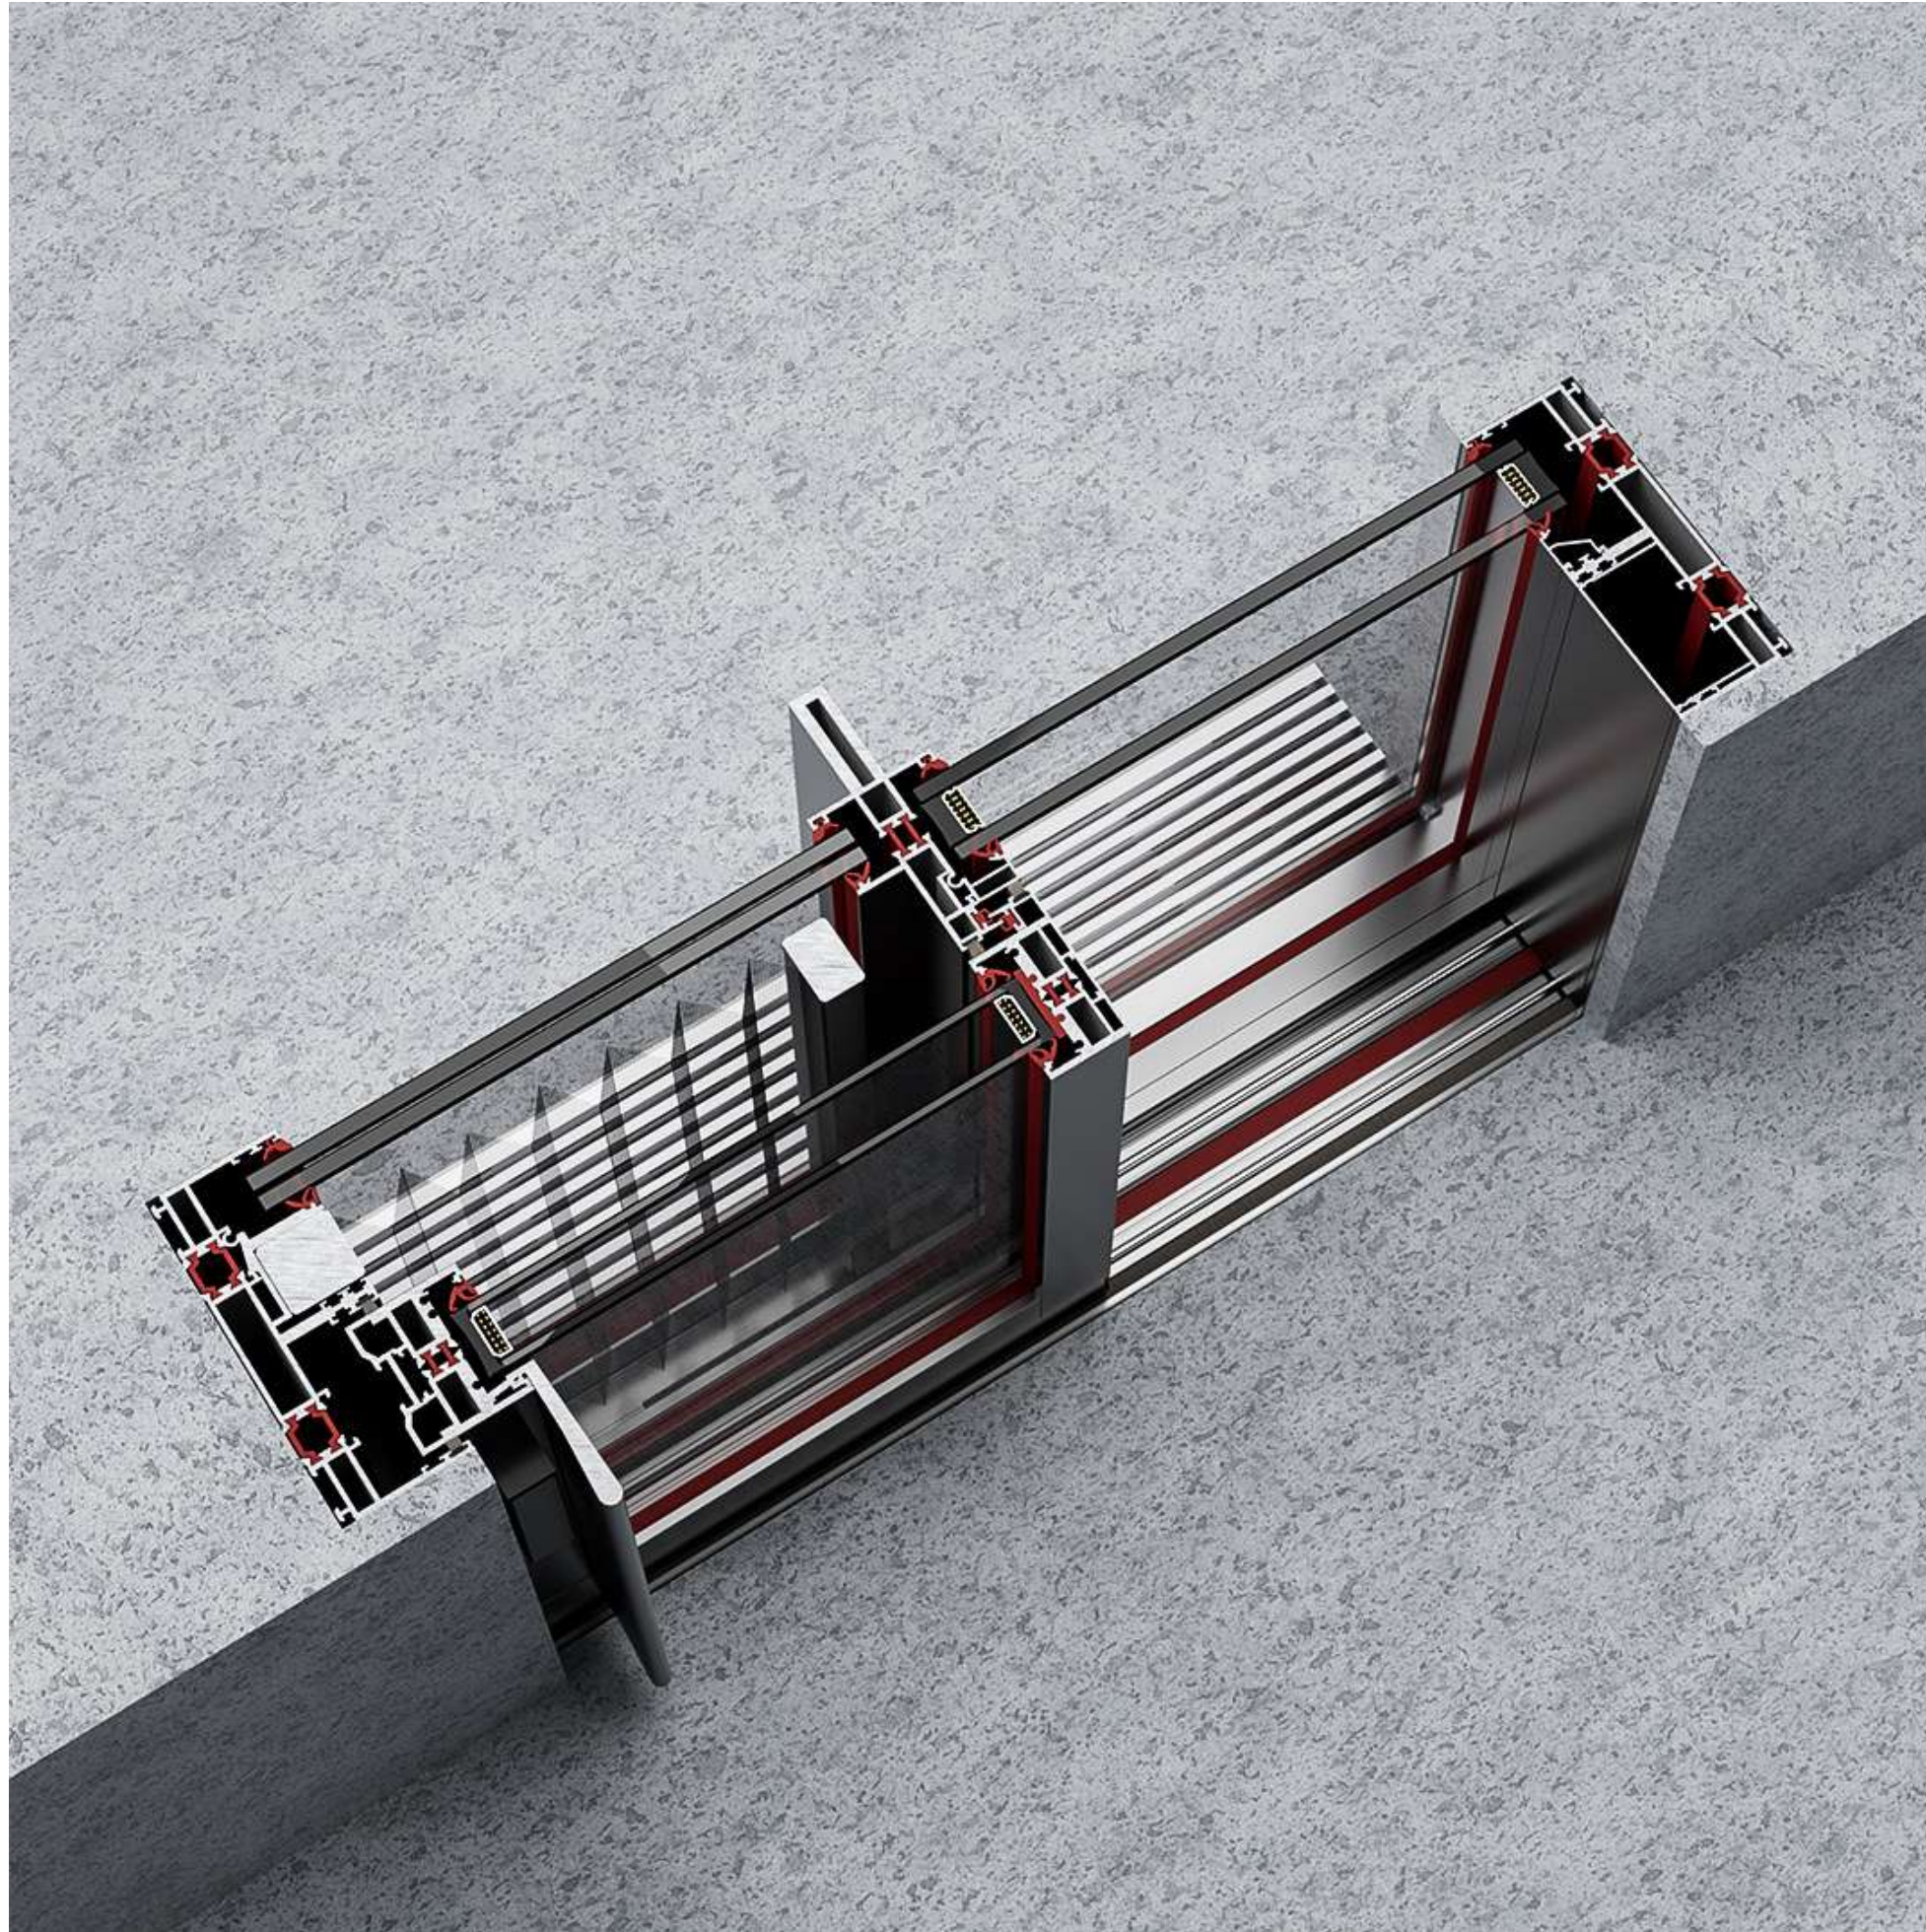

#### 耐冲击力强

采取后装式防止门扇被动升起而脱落 / 脱轨，无调节空间  
晃动间隙几乎为 0 的绝佳效果  
即使历经台风后也表现如初。

#### High impact resistance

The rear-mounted type is adopted to prevent the door leaf from passively rising and falling off/derailing, and there is no room for adjustment

Excellent effect with a shaking gap of almost 0  
Even after a typhoon, it performed as before.

## ONE SOLID AND ONE COMBINED 一固一活

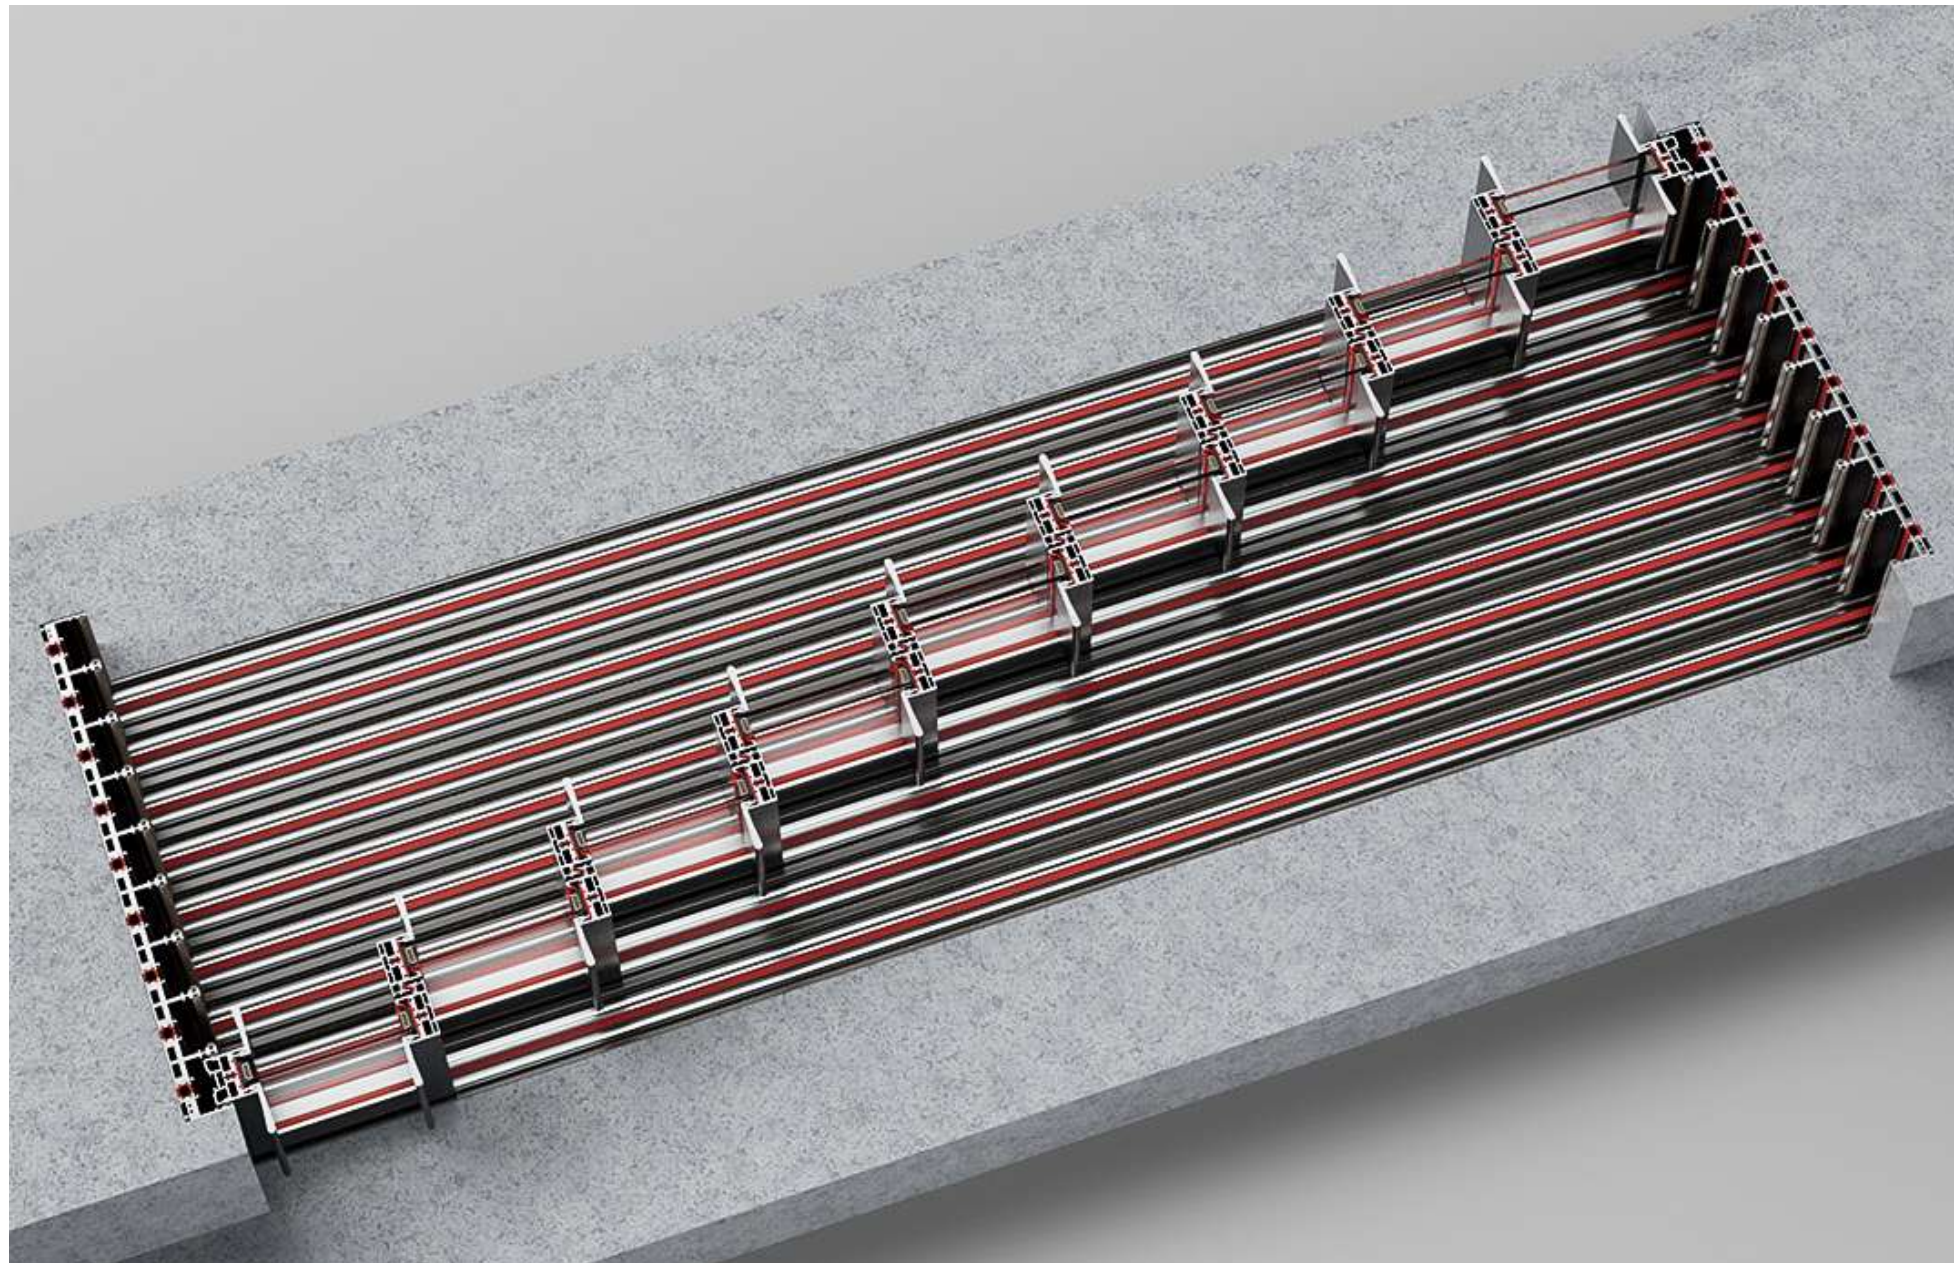

专业的固定 + 开启解决方案，一体化玻璃栏杆，安全的终结者，自带加强中挺的设计抗风压性好，可配左右折叠纱门以及可以上下回卷隐形纱窗。

Professional fixed + opening solution, integrated glass railing safety terminator, built-in reinforced mid-straight design, good wind pressure resistance, can be equipped with left and right folding screen doors, and can roll up and down invisible screen windows.

# Multi-track multi-fan

## 多轨多扇

对于极致采光通风的追求止于此  
实现了开放式的超大空间，进出自由，想开多大空间即开多大。

The pursuit of extreme lighting and ventilation ends here  
It realizes an open super large space, free entry and exit, and opens as much space as you want.

## Simple yet durable

## 简单既是耐用

该轨道方案可以确保 100% 无死角清理  
即使落叶、脏污、泥沙、头发  
堵住以后也能快速疏通。

This track plan can ensure 100% dead corner cleaning  
Even if leaves fall, dirt, mud, hair  
After being blocked, it can also be quickly cleared.

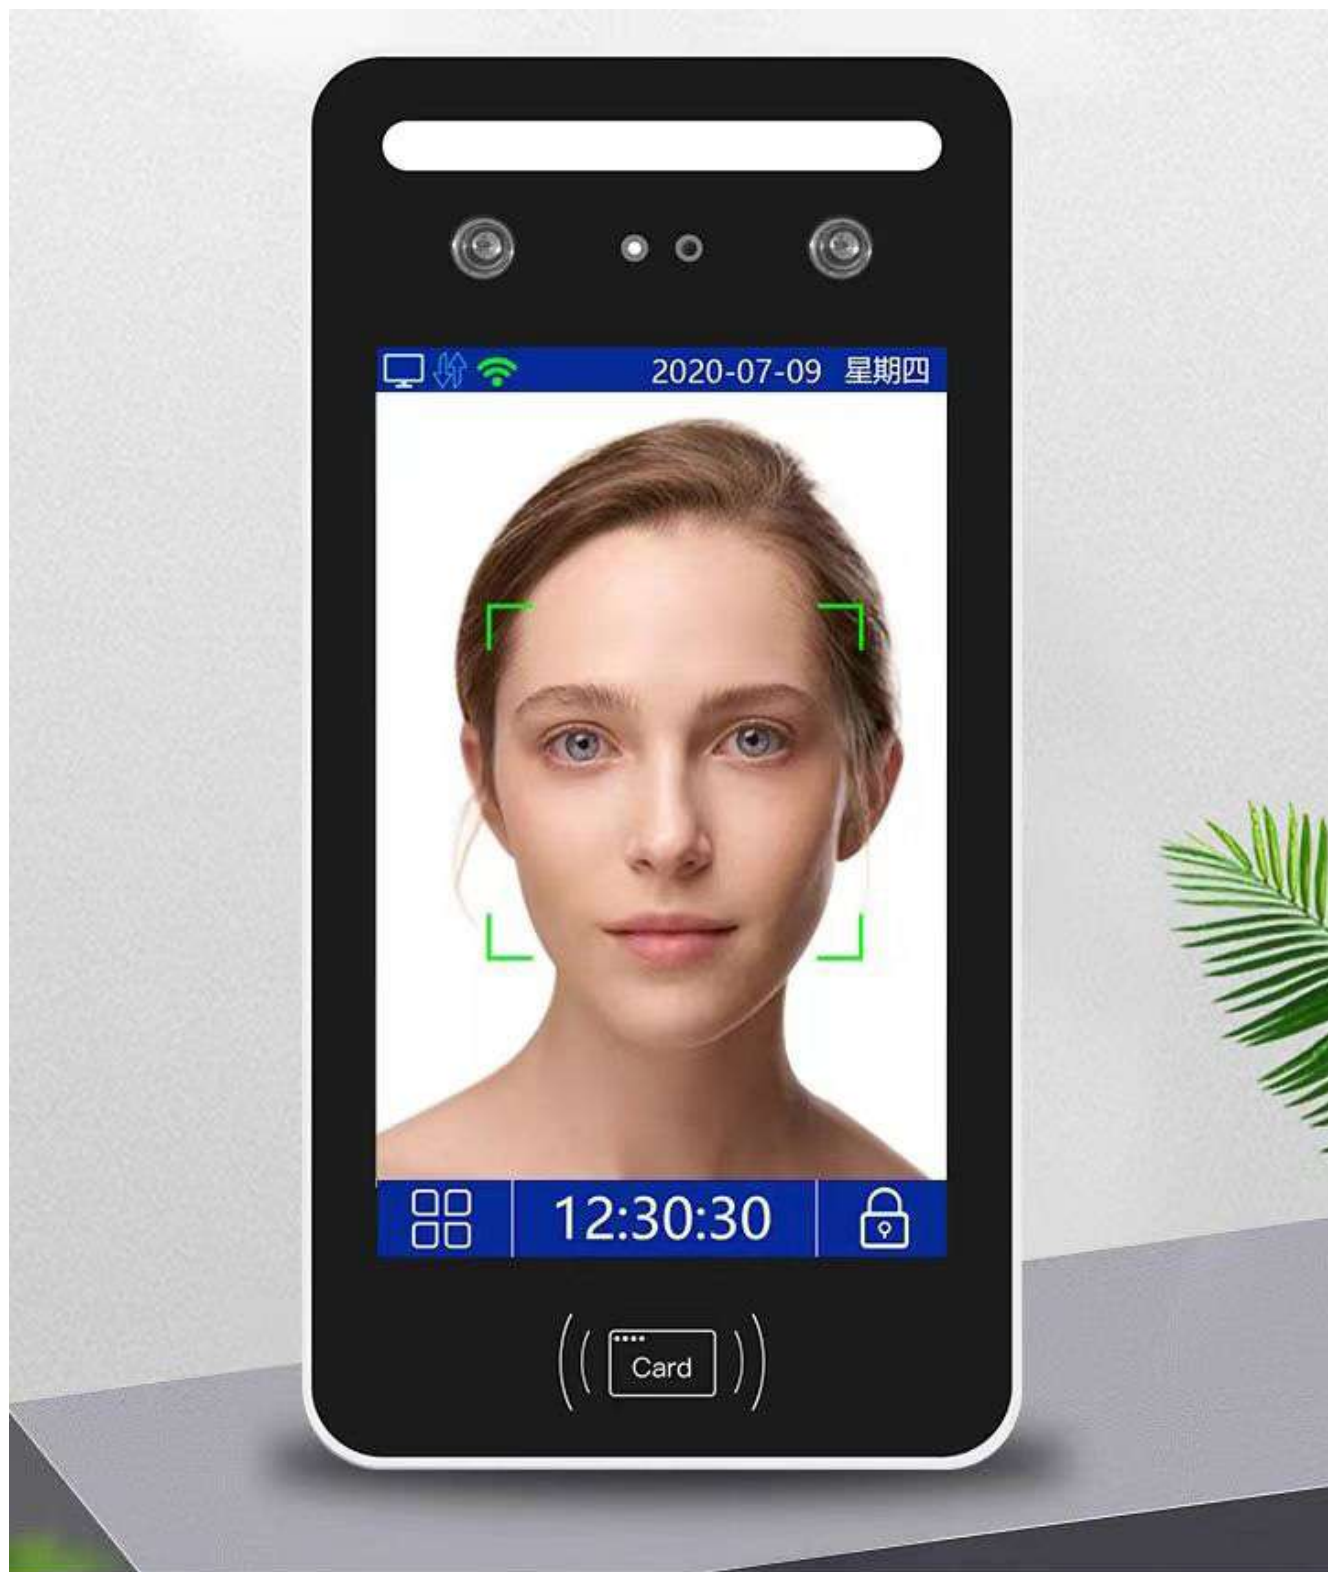

## Pocket door application solution

### 口袋门应用方案

- 将一切的多余全部舍弃，只留下最自然纯净的风景，以达到形意结合。
- Abandon all excess and leave only the most natural and pure scenery to achieve a combination of form and meaning.

- 将感应式灯光效果与滑动门结合，当门开启时迎宾灯自动亮起，使得进出更加方便，省去了开灯的操作，关门时灯光自动熄灭
- Combining the inductive lighting with the sliding door, the welcome light automatically lights up when the door is opened, making entry and exit more convenient and eliminating the need to turn on the light.

# translation system (electric intelligent system)

## 平移系统 (电动智能系统)

多功能延伸，智能高效更安全，配置无线接受控制器及开门感应器。

Multi functional extension, intelligent, efficient, and safer, equipped with wireless receiving controller and door opening sensor.

开门感应器

电动智能系统配件

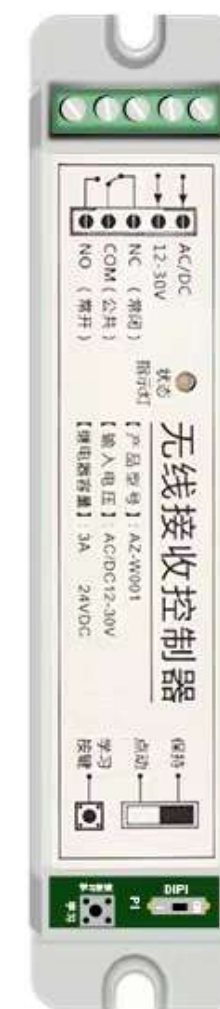

# Face brushing era Convenient instant opening

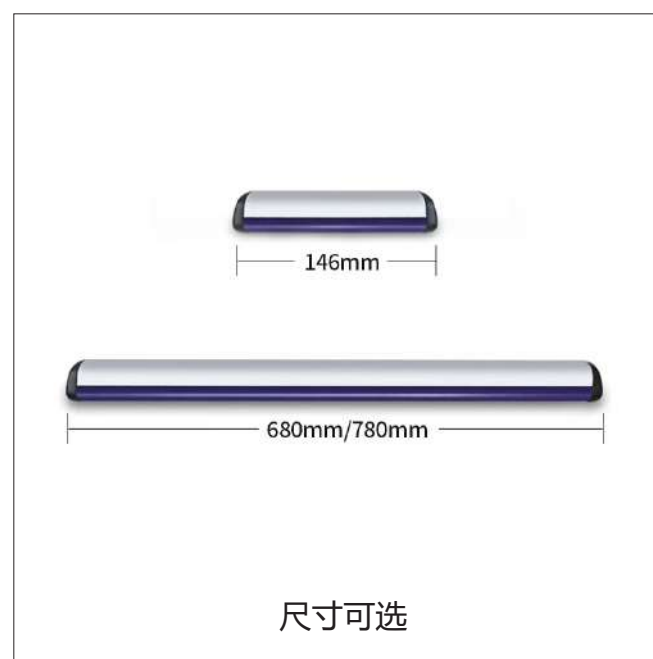

## 刷脸时代·便捷秒开

配置高清摄像头，3D 人脸识别，多种尺寸选择，智能开锁使用便捷。

Equipped with high-definition cameras, 3D facial recognition, multiple size options, intelligent unlocking and convenient use.

minimalist sliding door  
Translation System Solution

高端智能极简滑动门平移系统解决方案

<h1 style="color: red;">sliding door system</h1> <p>高端智能极简滑动门系统</p>	<h2 style="color: red;">20mini</h2> <p>是高端提升推拉门产品，它集成了全球顶尖的五金系统，通过联合开发将锁点与锁座不再突出门框或门扇，更为人性化的设计不仅如此，我们首次将通透性通透性融入产品，实现了无障碍进出的生活便捷性，门扇勾启极致到2厘米可视面纵向厚度突破13厘米，可应对不同高度的门体，下沉挤压式密封设计，结合隐藏排水系统，能够提升门体的防水密封性能。</p> <p><small>It is a high-end upgraded sliding door product, which integrates the world's top hardware system. Through joint development, the lock point and lock seat are no longer protruding from the door frame or door leaf, and the more humanized design is not only here, but also here. For the first time, we have integrated passability and transparency into the product, realizing the convenience of accessibility in and out of life. The door leaf hooks up to a maximum of 2 centimeters of visible surface, and the longitudinal thickness exceeds 13 centimeters, which can handle doors of different heights. The sinking compression sealing design, combined with a hidden drainage system, can improve the waterproof sealing performance of the door body.</small></p>  <p>隐框 /concealed frame</p>

# sliding door system

高端智能极简滑动门系统

## 36pro

是最具竞争优势的系列，它集成了诸多优秀设计，搭载的双实心304不锈钢轨道与平面轴承接触面仅为2MM，大大提高了滑动的顺滑度，前后型尼龙防摆的作用使得滑动门具有优异的防摆效果，加上整框注胶的工艺，与其他滑门的防水效果拉开了较大差距，是可以取代传统滑门的高性价系列。

It is most competitive series, integrating many excellent designs. It is equipped with a double solid 304 stainless steel track and a flat bearing contact surface of only 2mm, greatly improving the smoothness of sliding. The front and rear U-shaped nylon anti-swing function makes the sliding door have excellent anti-swing effect. Combined with the entire frame injection process, the waterproof effect of the sliding door is significantly different from other sliding doors. It is a high priced series that can replace traditional sliding doors.

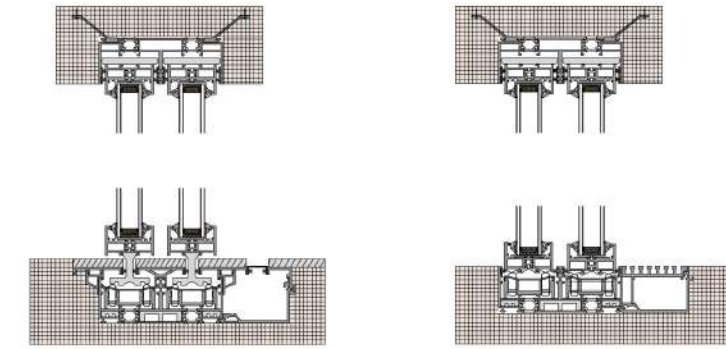

隐框 /concealed frame

## 36promax

是高端系列之一，拥有多项专利技术，是倒装轮组领域最具权威的产品，它攻克了轨道安装要求高技术难以及后期轨道热胀冷缩变形而导致滑门无法顺畅使用的技术难关，并且实现了轮组单模块化快拆与快装功能，售后维保成本缩减95%以上，非常适合超重型滑门的方案应用。

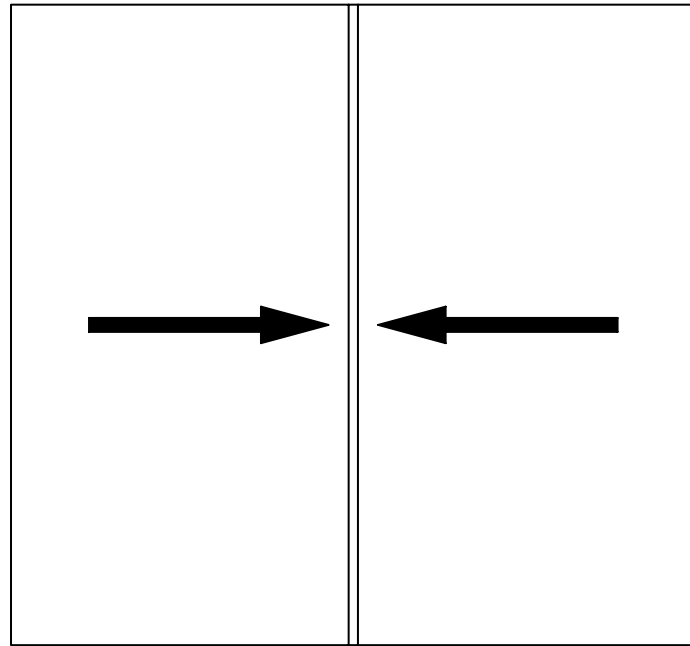

It is one of high-end series, with multiple patented technologies, and is the most authoritative product in the field of flip wheel assembly. It overcomes the technical difficulties caused by high technical requirements for track installation and the subsequent deformation of the track due to thermal expansion and contraction, resulting in the inability to use the sliding door smoothly. It also realizes the single module quick disassembly and quick installation functions of the wheel assembly, reducing after-sales maintenance costs by more than 95%, and is very suitable for the application of ultra heavy sliding door solutions.
